

ROHITH RAJ BAGGAM

rohith.baggam@aptagrim.com | +91 70933 89378 | Hyderabad, India

Education

B.E. Computer Science Engineering July 2019 – 2023

Chandigarh University, Punjab

CGPA: 7.0/10.0

Intermediate (MPC) Apr 2017-2019
Narayana Junior College, Visakhapatnam

CGPA: 9.71/10.0

SSC

Chanakya School

CGPA: 9.5/10.0

2017

Technical Skills

Languages Python, Java, SQL

Frameworks Django, DRF, FastAPI, Flask, Spring Boot

Databases MSSQL, PostgreSQL, MySQL, Cloud SQL, MongoDB

Cloud E2E Compute Nodes (Primary), GCP, AWS, Azure

Tools Git, Celery, Redis, Docker, Nginx, Gunicorn, Swagger, Postman, SonarQube, DBML

Certifications

- Google Cloud Platform – Production Deployment
- Neo4j Graph Data Science Cypher
- Code Quality – SonarQube, pre-commit, PEP-8

Professional Skills

- Team Collaboration Leadership
- Product Management Mindset
- On-time Delivery Ownership
- Knowledge Seeker

Personal Traits

- Building Personal Projects
- Quick Learner of New Tech Stacks
- Passionate about Optimization Techniques

Professional Summary

Results-driven Backend Engineer with 2.5+ years of hands-on experience building scalable, high-performance systems using Python, Django/DRF, REST APIs, and SQL. Expert in real-time applications, Google Maps integration, optimizing 100M+ row databases, and leading legacy migrations. Delivered production systems serving 10,000+ daily users with 99.99

Professional Experience

Aptagrim Limited — Backend Engineer to Technical Lead Jul 2023 – Present

BFSI Loan Recovery Platform

Aug 2025 – Present

- Architected deployed full backend stack on E2E Compute Nodes + EOS Object Storage
- Built real-time field-agent tracking using OSRM routing engine + WebSocket live location streaming
- Integrated Google Maps Geocoding, Places API Mappls for address validation, reverse geocoding route optimization
- Implemented LiveKit + ASGI for secure, low-latency real-time video calling

Factory Management System

Feb 2024 – Aug 2025

- Designed optimized complex SQL queries on 100M+ row MSSQL dataset (equipment readings, shift logs, violations)
- Led complete zero-downtime migration of 22-year-old Java-MSSQL legacy platform to modern Python/Django stack
- Built CRON-driven automation for shift reminders, round distribution real-time violation alerts

ATS HR Tech Platform

Aug 2023 – Feb 2024

- Designed developed scalable REST APIs using Django REST Framework
- Implemented asynchronous processing with Celery + Redis for bulk email campaigns, reminder triggers ML model inference
- Managed media storage using Azure Blob to E2E/GCP migration
- Used both relational (PostgreSQL) and NoSQL (MongoDB) databases effectively

Key Projects

Django Data Seed — Open-Source PyPI Package

Relational test data generator for Django with bulk insert foreign-key aware seeding

Highly useful for automated testing and migration reports

pypi.org/project/django-data-seed | [GitHub Link](#)

Rex — Real-Time Cross-Database Migration Framework

Encrypted WebSocket-based live data synchronization between Django instances with schema validation

Supports bulk streaming transfers securely

GitHub: [rohith-baggam/Rex-data-sync-receiver](#) | [Live demo on LinkedIn](#)
